The TnT Net

Cryptid – Animal types that science has yet to positively identify.

Bigfoot -Sasquatch (Pacific NW) – Mogion Monster (AZ) – Skunk Ape (FL) –
Grassman (NE OH) – Falc Monster (AR) – Yeti (Tibet)

- Tales go back to the late 1700s and early 1800s as explorers encountered Native Tribes who had legends.
- Proponents – Jane Goodall, Dr Jeff Meldrum, “the details of some of the footprint casts would be extremely hard to create/replicate over such a great area.”
- Best evidence is 1967 Patterson and Glimlin film from near Hoopa, CA. Special effects specialists of the time couldn't create a costume that could replicate the muscle movement seen in the clip. That year Cpt Kirk met “Gore.”
- No bones, excrement, hair, corpses or fossils have ever been found.
- Ft Lewis, WA, 1980, something followed and walked around my Ranger Patrol in thick forest in near total darkness. There were unusual cries just after sunset in certain areas of Ft Lewis. Combine a Peacock call and a woman's blood curdling scream.

Motthman

- First sighting in Clendenon, WV by men digging a grave on 12 Nov 1966. Next sighting near Point Pleasant, WV by a couple driving late at night on a country road three days later. It chased them at speeds approaching 100mph. A few weeks later it was seen in the area of the “Silver Bridge” just before and after it collapsed killing around 40 people.
- It is described as a large humanoid with owl type wings and glowing red eyes.
- Has not been sighted in decades.

Ningen

- Spotted in the Antarctic Ocean by Japanese Whale research vessels in recent years. There are drone photos online.

Owlman

- Sighted near Cornwall England between 1976 – 1995.

Atmospheric Jellyfish

- Sighted worldwide between 1974 – 2015.
- Many photos and videos are online.

Fresno Nightcrawler

- Caught on security cameras in Fresno, CA and also in Poland.
- Videos online.

Hook Island Sea Monster

- Sighted near Australia in 1964 by people fishing from a boat.
- Photos are online.

Red Giant of Kandahar

- Found in 2002 in Afghanistan by members of the US Army.
- A patrol went out and didn't return. A Special Forces team was sent to investigate. They found equipment and body parts outside a cave. Investigating, a "Red haired Giant" came out and engaged them. The soldiers eventually killed the giant. It was transported back to a military camp. It was never seen again.

Chupacabra

- Translates to "Goat Sucker."
- First encountered in Puerto Rico in the early 1970s in PR, where it's credited with sucking the blood from some local herds.
- Has been reported in Central America, Mexico and the SW United States.
- Described as a hairless dog type with three clawed feet and large fangs.
- Reports of sightings and activity continue today.

My speculations on all of these things, in Genesis in the Bible, where 1/3 of the angels rebelled against God with satan, these fallen angels have the ability to travel between dimensions, appearing in different forms.

MIT has stated that in String Theory and Quantum Physics, there are at least 9 dimensions. All these cryptids have in common the ability to appear and disappear at will, leaving no trace.

My belief is that these cryptids are those fallen angels, in beast form traveling between dimensions through portals. This is the simplest explanation for their sudden appearance and disappearance. It also explains why no bones, excrement, hair, fossils or young have ever been found. A common thread as relates to the Bigfoot strain. Many of the very active areas are in traditional Native American Tribal areas. The Navajo Tribe in particular have passed down the knowledge/tradition that they communicate with beings from other dimensions that move through portals within their lands. Places like "Skinwalker Ranch and Blind Frog Ranch" in UT have had interactions with what can only be described as dimensional portals.

Three people who have many books and videos on You Tube are:

L.A. Marzulli

Tim Alberino

Tom Horn

ADDITIONAL CRYPTIDS

- Loch Ness Monster, Lake Geneva Monster, Champ of Lake Champlain, all aquatic cryptids who live in large lakes.
- Thunderbirds from Native American legend and stories of early travelers in the American west.
- Jersey Devil of New Jersey haunts the Pine Barrens of NJ, first reported in 1735 and still sighted today. Kangaroo body with cloven hooves and a bat type of wings with a forked tail.
- Windigo of the Canadian Great Lakes area of Algonquin legend. Is reported to have a humanoid, skeletal body and long claw type nails. Said to eat humans.
- Dover, MA., 21 April 1997, there were multiple sightings of a "Gray ET" type being. Two separate witnesses, who had had no contact with each other made sketches of what they saw. They were quite similar.
- Loveland Frogman. Spring of 1955, a policeman sighted three figures he estimated to be about 4' tall crossing a road. He lost them in pursuit. A few weeks later in the same area, another policeman sighted a similar creature. He was able to shoot and kill it. Turned out to be a large Iguana that was missing its tail. No further sightings.

Feel free to research on your own to find more of the over 100 cryptids that have been reported worldwide.
