

The Russian Connection

- Standard Oil Company of New Jersey and New York (owned by the Rockefeller family) was one of the first companies to invest and develop reserves within Russia. Chase Bank (owned at the time by the Rockefeller family) in large part financed the Bolshevik Revolution.
- Within the WEF is the *Young Global Leaders* program where they indoctrinate young politicians and bureaucrats to the WEF agenda. Until a few years ago Mr Putin was openly listed as a member on their website. Many names have been scrubbed from that list lately. YouTube has video of Schwab meeting with Putin from Russian TV and presentations where Schwab identifies Putin as a member of the group. Mr Schwab has many times stated some of the YGL members are Putin, Tony Blair, Angela Merkel, Prime Minister Trudeau to name a few.
- 22 Nov 2019 Soros meets with China's President.
- 27 Nov 2019 Schwab meets with Mr Putin. What disaster is released soon after these *coincidental* meetings?
- Oct 2021, Russia joins the WEF *Joint Center for the Fourth Industrial Revolution*. This 'revolution' is based on AI and trans-humanism, the combining of the body with technology.
- Part of this centers focus is 'Technology Governance' 'Global Supply-chain and Blockchain Development.' Very soon after this announcement Russia invaded Ukraine where these things came to the forefront. Coincidence?
- Bank of Russia has launched CBDC in a limited scope in the past year.
- Russia is developing and fielding soon a digital ID that will replace Passports. The digital ID program is headed by Prime Minister of the Russian Federation, Mikhail Mishustin.
- 2021, Cyber Polygon (part of the WEF) had an online conference. Mr Mishustin was a guest of honor. Also attending were TASS, NTV (largest private TV company in Russia), Sber, Tinkoff (the two largest banks in Russia), Mail.ru Group and MTS (largest cell provider in Russia and AI bank).
- 2023, Mr Putin, while being interviewed by Tucker Carlson made this statement. “ You are hurting yourself by attempting to limit malignant Chinese Communists Party influence on the American economy.” If Russia and China are enemies, why talk about things that benefit China?

The worlds media (Ministry of Truth), and politicians of all parties are shouting that Russia and China want to defeat globalism and the elites. Both are developing and implementing their own agendas that just *coincidentally* follow those 8 WEF

predictions for 2030. The Russia, Ukraine war and China's designs on Taiwan, are these fights against globalism? Or are they really just jockeying for their promised places in the NWO?
